DELIVERING MORE

At World Wide Sires we have had a long-term commitment to providing industry leading CONCEPTION rates on sires that offer CALVING EASE and CARCASS while keeping your COW herd in mind. However, we are most proud of our unmatched CUSTOMER SERVICE!

We have a team of extremely talented experts across the country who work hard every day to make you more profitable using time tested strategies and innovative technologies.

Relationships matter. We genuinely believe that relationship building is the foundation upon which significant results can be achieved and together we can achieve more than any one entity can alone.

As a cooperative, our priorities will always be to invest in and strengthen our relationships with our farmerowners, seedstock partners, employees, and supply chain team members. We've found that creating and capturing value are strengthened by relationships built on integrity and trust, and we believe these strong relationships are vital to achieving our bold vision of cooperation, shared success and sustainability.

Worldwide demand continues to grow, especially for high quality beef. Now is the time to invest in our nation's cow herd and continue to move the industry forward to feed the world.

From the entire team at World Wide Sires, THANK YOU! Thank you for trusting in our team to deliver the evergrowing needs of your herd. We value every customer and relationship!

Gratefully,
The World Wide Sires Beef Team
Dale, Geoff, Dave, Tim and Annie

* USA EPD's DOCILITY

- Texas Thunderstruck is the single most talked about sire to sell in the Angus breed this year, and sent shockwaves around the world with his all time record price of \$360,000, purchased by Mackas Pastoral
- The first of only two Poss Rawhide sons to sell in Australia this year Thunderstruck with his rockstar good looks
- And his unique pedigree broke the the Australian record all breeds price for a bull and secured interest from around the country and around the world
- Admired as the absolute standout calf in his 350 cow/calf contemporary group. Thunderstruck is jet black with a striking presence of power and performance, and the type and kind admired by the many astute cattle breeders who inspected him.
- Thunderstruck displays the type of temperament the Angus breed craves, with a beautiful kind eye and gentle look he sits in the top 7% of the breed on docility
- The dam Texas Omnia M462 has a calving interval of 370 days over 6 calves through one of the worst droughts Texas has seen and the grandmother E166 is still in production at 15 years of age and will enter IVF production this year
- Fertility and longevity is everything we strive for in modern Angus cows and Thunderstruck has that flowing through his veins
- As you study the data, Thunderstruck combines calving ease, growth, breed-leading EMA and docility in a pedigree so unique in the breed. It makes him the absolute must use sire to drive progressive breeding programs to that next level and beyond.

SITZ ESSENTIAL
731J here

- ESSENTIAL was the \$100,000 high selling bull at the 2022 Sitz spring sale selling to Spring Cove Ranch and Triple L LLC, ID
- What a combination of calving ease, growth, maternal and carcass. Few bulls offer a top 10-15% ranking for CE, WW, YW, HP, MARB and \$M
- ESSENTIAL is built for high altitude being a breed leader for PAP, ranking in the Top 1%!
- Go-to calving ease sire with excellent phenotype!

 video of KO
 TELEPORTER
 here

- One of the high profile bulls to sell in 2023 and a much talked about genetic profile has KO Teleporter on the "must use" list this spring
- The \$100,000 high seller in the recent KO Angus bull sale, Teleporter has an EBV profile that is hard to ignore with high end predictors
- He stands out for all the key economic traits: Gestation Length, Growth, MCW, Scrotal, EMA and IMF; along with top 1% on all indexes
- One of the highest indexing bulls to sell this year, Teleporter is as impressive phenotypically as he is on paper
- Massive in his dimension, deep sided, soggy made and smooth moving, this extremely docile son of sales leader Gar Hometown ticks every box when you see him in the flesh
- The dam KO Moongara L75 is a model Angus cow: moderate in stature, perfect footed, docile and a list of progeny fast tracking her to stardom in the Angus breed
- Use KO Teleporter with confidence in his superior, proven maternal lines and an EBV set hard to fault and match across all lines

- The single most talked about bull of the Spring 2022 sales season, CRAFTSMAN was the \$500,000 record setting high seller at Connealy's sale!
- CRAFTSMAN posted very impressive performance ratios of 120@WW, 119@YW, 154@IMF, and 107@RE in a large contemporary group
- Sired by Sitz Resilient out of an impressive young Niobrara daughter, CRAFTSMAN's physical presence and breed character add to his overall package. He is striking though his front 1/3 and offers great length and shape down his top with combined with excellent structural integrity.
- Highly sought after for his combination of \$M and \$C, along with the parts that compile those indexes. Mating options and directions are endless with CRAFTSMAN!

- GIBSON was added to the lineup as a proven calving ease sire that also offers the extra bells and whistles
- He ranks in the top 1% for \$M, CLAW and REA and top 2% for ANGLE and \$C
- Look for these calves to come easy and have the added muscle shape that most calving ease sires do not offer
- Elite foot scores and added muscle and body make GIBSON an ideal choice to create replacement females
- The dam and bred heifers were a highlight at LT ranch this summer. The disposition and type were admired by all.

- FIREPROOF was the highly anticipated lot 1 sire for Gardiner's April 2023 sale!
- He is easily one of the most sought-after sires in the Angus breed for his elite data set
- FIREPROOF's genetic predictions are off the charts! He is top 1% for MARB, \$B and \$C and not just top 1% but he is in the top 1% of 1%!
- Very smooth, up headed, attractive and deep ribbed, FIREPROOF offers the extra eye appeal some have come to expect from carcass leaders such as 7AN580 HOME TOWN
- FIREPROOF is a calving ease sire also offering extra growth as well as offers an elite ranking for PAP and HS

- WOW, what a package! APEX sold as lot 1 in Gardiner's sale in January 2023.
- APEX offers elite carcass predictions we expect from Gardiner Angus Ranch, ranking in the top 1% for both REA and MARB and is over +200 for \$B
- Not just a carcass sire, APEX also offers superb predictions for DOC, HP, PAP and HS — what a bonus!
- A 7AN624 DUAL THEAT son, APEX, offers extra frame and length without sacrificing body depth
- A lot of predictability in his pedigree, including GAR greats such as 7AN389 SURE FIRE, Ashland and 7AN320 PROPHET

- New to Select Sires for 2023!
- While touring this summer, GRAND CANYON jumped onto our radar. Sired by the popular Select Sires great, RAINFALL, GRAND CANYON offers the stunning phenotype and power that we have come to expect from Schaff Angus Valley.
- GRAND CANYON offspring will impress in his first sale season. They are easy to pick out for their added dimension, power, and presence.
- Look for GRAND CANYON to improve foot quality and add depth, muscle, and breed character to your calf crop

- STEP UP is a true beef sire! He enters our lineup as a semi-proven sire that has already made his mark in many Angus production sales across the country. His first crop of heifer calves were top sellers from coast to coast in the fall of 2022. Expect to see many top selling sons from STEP UP in 2023.
- He has a rare combination of traits breeders are desperately searching for. He exhibits excellent foot quality with extra heel depth while still ranking in the top 2% of the breed for Marbling.
- Step Up is a good structured, wide based, deep bodied sire with extra width of top and muscle expression. He stands on a big solid foot and has that masculine herd sire look breeders admire.
- STEP UP consistently sires stout made, high performance, eye appealing cattle while adding foot quality and end-product merit. Take a "Step Up" in your breeding program.

- STATESMAN is one of the most talked about new sires in the Angus breed
- He has a fresh pedigree for Select Sires with exceptional mating flexibility. He will complement 7AN528 GROWTH FUND and 7AN580 HOME TOWN females from both a phenotype and EPD perspective.
- STATESMAN is the sire of choice if you like elite index values, big spread and high phenotype
- He checks all the boxes by offering breed leading HP, marbling and excellent foot scores
- STATESMAN is a sire that should work in high elevation programs with a PAP EPD in the top 3% of the breed

 HERO here

- Sired by the red-hot sales leader, 7AN580 HOME TOWN, HOMETOWN HERO could easily be his most unique son
- HOMETOWN HERO is an absolute phenotypic standout that is a man among boys. He is powerful from end to end with tons of base width and capacity.
- Power sire with good feet, solid foot EPDs and lots of MARB. Those are traits not usually talked about in the same sentence and this is why we are so excited!
- Famous pedigree that combines Select Sires greats of 7AN580 HOME TOWN, 7AN392 MOMENTUM, 7AN320 PROPHET and 7AN255 5050

- RIVAL is no doubt one of the most exciting and sought-after young sires to enter A.I. in 2022!
- A son of the hottest sire in the breed, 7AN528 GROWTH FUND, RIVAL maintains great phenotype and growth but offers more carcass merit
- RIVAL's actual scan ratios were extremely impressive, 232 IMF and 125 REA!
- His dam already has a WW ratio of 2@111 and YW ratio of 2@110 and is well on her way to Pathfinder. His granddam and great granddam are both Pathfinders!

- Exciting new prospect with an outcross maternal pedigree. He offers many mating options to current Angus pedigrees.
- Excellent Calving Ease and curve bending growth coupled with phenotype and Angus characters you expect with his number set
- He is an eye-appealing and balanced sire. He combines an up headed and smooth front third that you are looking for to mate to heifers and cows. Yet he is deep and capacious with plenty of muscle.
- We are excited that he offers a complete package with 17 traits in the top 20 percent of the breed with many of those in the top 5%
- Unmatched Calving Ease data now flooding in from across the country show ENDEAVOR to be the absolute 'CALVING EASE KING' of Australian Angus

7AN629 GAR TRANSCENDENT

\$60 RRP

- Breeding TRANSCENDENT to a breed-average Marbling female lands the calf in the top 1 percent. Think about it.
- Like no other bull in the Angus breed history, TRANSCENDENT takes carcass quality to a whole new level. He makes sought-after prime premiums even more attainable.
- Yes, his Marbling EPD is off the charts. Another difference-maker trait with this bull in his YH EPD. Some of you already understand, for those who don't, just ask someone who does.
- TRANSCENDENT's sire and MGS (MOMENTUM and PROPHET) have over 400 actual carcass records between them. There's a reason why bulls like this one rise to the top.

7AN698 BIGK/WSC IRON HORSE 025F

\$60 RRP

- New to Select Sires for 2022. IRON HORSE has been on our radar for some time and we are excited to add him to our lineup as a proven sire
- Study his EPD profile closely. IRON HORSE is a high ranking \$C sire that also brings exceptional growth and carcass. However, his most unique traits are his high-ranking foot EPDs. High \$C with great foot EPDs are very rare!
- IRON HORSE complements his EPD profile with great phenotype.
- Lots of mating flexibility being an outcross for most. EXAR Stallion x BUTKUS.

7AN689 GAR INCENTIVE

\$50 RRP

- Outcross alert! INCENTIVE sold as the Lot 1 bull in the 2022 GAR Early Bird Sale in January.
- He's high for Marbling EPD at +1.60 and \$Combined at +350
- However, his real value may be in his outcross pedigree, offering a lot of opportunities in many of the herds we serve where carcass merit is a priority

- Few sires can put together a 'TOP CUT' of as many traits as this youngster. Several significant programs have found him and put him to use.
- Breeders coast-to-coast are discovering that high \$Maternal together with high \$Combined is a great place to be. TOP CUT provides this opportunity.
- Below-average for YH, TOP CUT is solidly made and sound with numbers that draw attention

- Elvis’s maternal granddam is the mother of E10, one of only three animals with a marble score of 2.8 with over 95% accuracy
- His sire, D14 is bred from high marbling genetics identified as a standout performance sire in first cross Australian and Japanese feeding programs
- With exceptional combination of marbling, maternal, growth and carcass weight performance, Elvis has multiple breeding indexes in the top 1% of the Wagyu breed
- Elvis was bred to be an outcross for fullblood Wagyu herds as well as having a proven first cross performance pedigree

- The single most sought-after bull in the 2022 sale season, JUMPSTART was admired by many of the top Red Angus breeders in the business commanding a recording setting \$185,000.
- JUMPSTART combines elite data with exceptional phenotype. Very few sires offer as much power and muscle shape as JUMPSTART, yet still rank among the best in the breed for Calving Ease.
- JUMPSTART is an absolute physical specimen that is loaded with width and power as well as having great foot shape and heel depth.
- He ranks in the TOP 1% for 7 different traits including ProS and GM! A must use sire!

- HONOR GUARD is an exciting new red addition to Select Sires for 2023 entering as a semi-proven sire!
- Check out his data set, it is hard to find a hole! He has a great balance of calving ease, growth, maternal and carcass, highlighted by a top 1% ranking for STAY and top 2% ranking for API.
- HONOR GUARD's first calf crop is very attractive and correct, offering confidence in the type and kind he will create.
- HONOR GUARD is very sound and athletic with extremely good foot quality and is a must-use sire for red enthusiasts!

7SM125 CDI MAJOR IMPACT 280H

\$35 RRP

- We have been on the hunt for a powerful "cow sire" and the search led us to the addition of MAJOR IMPACT
- He is a high-ranking growth, elevated performance, and product-oriented sire. MAJOR IMPACT truly excels in maternal numbers, all while remaining sensible in frame size, CE and BW EPD's.
- MAJOR IMPACT is a LCDR Impact 134F son, the high selling Sugar C4 son that resides at Rydeen Farms in MN. With semen unavailable from his sire, MAJOR IMPACT is a great alternative.
- PB SM

7SM122 SCHOOLEY STANDOUT 27G

\$40 RRP

- STANDOUT is easily one of the most exciting sires not only to enter Select Sires lineup, but the entire A.I. industry!
- A very complete bull that is great on his feet and legs, offers plenty of hip and muscle yet offers an exceptional amount of eye-appeal
- However, it might be his EPD profile that sets him apart. He is a top ranking API sire (top 3 percent) that also ranks within the elites of the breed for Docility (top 1 percent) and Marbling (top 3 percent). Combine all that with the fact he is out of one of the elite cows in the bred in CLRS Beauty Queen 420B, and you truly have the complete package.
- His combination of phenotype and genotype are unmatched
- STANDOUT is just as his name suggests, he stands out from the rest!!!

7CH105 RENN **SILVERSMITH** 903G

\$35 RRP

- SILVERSMITH is an elite carcass merit Charolais sire
- He ranks near the top of the breed for WW, YW, Marbling, REA and Carcass Weight
- SILVERSMITH ranks in the top 3 percent of the breed for Terminal Sire Index (TSI)
- He had individual ratios of 97 BW, 105 WW, 105 YW, 104 REA and 122 IMF
- He recorded a 4.43 Average Daily Gain while on test
- Homozygous polled

EXPECTED PROGENY DIFFERENCES **TERMINOLOGY**

Expected Progeny Difference (EPD) - The expected difference in performance of a bull's progeny compared to the performance of another sire's progeny.

Accuracy (Acc.) - A measure of reliability of an EPD expressed between 0 and 1.0. Accuracies closer to 1.0 means the EPD is a more reliable estimate of a sire's true genetic value for the trait.

% Rank - Based on percentages, this indicates where a bull's EPD ranks him in the entire population of his respective breed.

Proof Positive  - Bulls that are .85 or higher accuracy for Birth Weight EPD.
™Proof Positive is a trademark of Select Sires Inc.

Fertility Verified  - Bulls have to have a 3.0 or higher on their CFI data of which is collected by breeding dairy cattle to beef semen and calculating a fertility rating.

gender Selected  - This icon identifies sires with sex-sorted semen available.

Calving Ease Direct (CED) - is the difference in percentage of unassisted births when a sire is bred to first calf heifers. A higher number is desirable.

Birth Weight (BW) - predicts the difference in average birth weight of a bull's calves compared to calves of another bull. Reported in pounds, a lower number is desirable.

Weaning Weight (WW) - predicts the difference in average 205-day weight of a bull's progeny compared to calves of another bull. Reported in pounds, a higher number is desirable.

Yearling Weight (YW) - predicts the difference in average 365-day weight of a bull's progeny compared to progeny of another bull. Reported in pounds, a higher number is generally desirable.

Yearling Height (YH) - The YH EPD predicts the difference in yearling hip height of a bull's progeny compared to progeny of another bull. Reported in inches, ideal values vary depending on production environment.

Residual Average Daily Gain (RADG) - expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Dry Matter Intake (DMI) - expressed in pounds per day, is a predictor of difference transmitting ability for feed intake during the postweaning phase, compared to that of other sires.

Scrotal Circumference (SC) - The SC EPD predicts the difference in yearling scrotal circumference of a bull's male progeny compared to progeny of another bull. Reported in centimeters, a larger number is desirable.

Dolcility (Doc) - is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Calving Ease Maternal (CEM or MCE) - is expressed as a difference in percentage of unassisted births of a sire's daughters as first-calf heifers when compared to daughters of other sires. Reported as a percentage, a higher value is desirable.

Milk (MILK) - The milk EPD predicts the difference in average 205-day weight of a bull's daughters' calves compared to the calves from daughters of another bull. Reported in pounds, ideal milk values depend heavily upon the nutritional environment of the herd.

Maternal Weaning Weight (MWW - Simmental); Milk and Growth (M&G - Hereford); Total Maternal (TM - Red Angus) - The EPD predicts the Weaning Weight of a bull's daughters' progeny and reflects both the milking ability of a bull's daughters and the growth potential of their calves. Reported in pounds, higher numbers are generally desirable.

Stayability (STAY - Red Angus & Simmental) - The stayability EPD predicts the probability of a bull's daughters staying in production to at least six years of age compared to daughters of another bull. Reported as a percentage, a higher value is desirable.

Carcass Weight (CW) - The EPD predicts the difference in hot carcass weight of a bull's progeny compared to progeny of all other bulls evaluated at a given endpoint. Reported in pounds, a higher number is generally desirable.

Marbling (MARB, IMF) - The EPD predicts the difference in average USDA Marbling score of a bull's progeny compared to progeny of another bull at a similar end point. Reported in degrees of a Marbling score, higher values are desirable.

Ribeye Area (REA) - The EPD predicts the difference in ribeye area of a bull's progeny compared to the progeny of another bull and is an indicator of total muscle in the carcass. Reported in square inches, larger numbers are generally desirable.

Fat (FAT) - The EPD predicts the difference in fat thickness of carcasses, measured between the 12th and 13th ribs, of a bull's progeny compared to progeny of another bull. Reported in inches, lower values are desirable.

Yield Grade (YG - Simmental) - The EPD predicts differences in USDA Yield Grade of a bull's progeny compared to progeny of another bull. Reported in tenths of a USDA YG, lower numbers are desirable.

ANGUS:

Cow Energy Value (\$EN) - expressed in dollars saved per cow per year, the EPD assesses differences in cow energy requirements for daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). \$EN savings differences account for lactation energy requirements and mature size of cows.

Maternal Weaned Calf Value (\$M) - an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W) - an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Feedlot Value (\$F) - an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G) - an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B) - an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Combined Value (\$C) - an index value expressed in dollars per head, hat blends both maternal and terminal indexes using information and relationships from 14 different traits.

Certified Angus Beef  - ®Certified Angus Beef and CAB are registered trademarks of Certified Angus Beef LLC.

SIMMENTAL:

All-Purpose Index (API) - Expressed in net dollars returned per cow exposed, evaluates Simmental sires being used on the entire cowherd (bred to both Angus first-calf heifers and mature cows) with a portion of the daughters retained for breeding and the steers and remaining heifers fed and sold on a carcass grade and yield basis. With the exception of shear force (tenderness), all EPDs are considered in this index.

Terminal Index (TI) - Expressed in net dollars returned per cow exposed, evaluates the merit of sires when bred to mature Angus cows and all progeny are fed and sold on a carcass grade and yield basis. Consequently, maternal traits such as milk, stayability and MCE are not considered in this index.

SimAngus - SimAngus™ is a trademark of the American Simmental Association.

RED ANGUS:

HerdBuilder Index (HB) - As the name indicates, implementation of the HerdBuilder Index will assist producers in building profitable herds. The HerdBuilder Index is built using the following production scenario: Red Angus bulls mated to cows and heifers (resulting progeny ¾ Red Angus, ¼ Simmental), replacement heifers retained from within the herd, and all remaining progeny sold on a quality-based carcass grid.

GridMaster Index (GM) - While Red Angus has traditionally been known as a superior maternal breed, those who have retained ownership in Red Angus calves know of their potential to excel in the feedyard and ultimately hang a premium carcass. The GridMaster Index is built using the following production scenario: Red Angus bulls mated to cows (resulting progeny ¾ Red Angus, ¼ Simmental) and all progeny sold on a quality-based carcass grid.

HEREFORD:

Baldy Maternal Index (BMI\$) - This is an index to maximize profit for commercial cow-calf producers who use Hereford bulls in rotational crossbreeding programs on Angus-based cows. Retained ownership of calves through the feedlot phase of production is maintained and the cattle are to be marketed on a CHB pricing grid.

Certified Hereford Beef Index (CHBS) - This is a terminal sire index, where Hereford bulls are used on British-cross cows and all offspring are sold as fed cattle on a CHB pricing grid. There is no emphasis on milk or fertility since all cattle will be terminal. This index promotes growth and carcass.

EXPECTED BREEDING VALUES TERMINOLOGY

The following is a brief description of Angus **GROUP BREEDPLAN EBVs** and **\$Index Values** and Accuracies. For a more detailed explanation of these please refer to the Angus Society of Australia web site (www.Angusaustralia.com.au).

ACCURACY (%) ~ Provides an indication of the reliability of an EBV. As more performance information becomes available on an animal (or it's progeny, or relatives) then the accuracy of it's EBVs for particular traits will increase.

CALVING EASE DIR (%) ~ Estimates of the genetic differences between animals in the ability of their calves from 2 year old heifers to be delivered without assistance.

CALVING EASE DTRS (%) ~ Estimates of the genetic differences between animals in the ability of their 2 year old daughters to calve without assistance.

GESTATION LENGTH (DAYS) ~ Estimates of the genetic differences between animals in the number of days from the date of conception to the calf birth date.

BIRTH WT (KG) ~ Estimates of the genetic differences between animals in calf birth weight.

200-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 200 days of age.

400-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 400 days of age.

600-DAY WT (KG) ~ Estimates of the genetic differences between animals in liveweight at 600 days of age.

MATURE COW WEIGHT (KG) ~ Estimates of the genetic differences between animals in cow weight at 5 years of age.

MILK (KG) ~ Estimates of the genetic differences between animals in milk production, expressed as variation in 200-day weight of daughter's calves.

SCROTAL SIZE (CM) ~ Estimates of the genetic differences between animals in scrotal circumference at 400 days of age.

DAYS TO CALVING ~ Estimates of the genetic differences in female fertility, expressed as the number of days from the start of the joining period until subsequent calving.

CARCASE WEIGHT (KG) ~ Estimates of the genetic differences between animals in carcase weight, adjusted to 750 days of age.

EYE MUSCLE AREA (CM²) ~ Estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site, in a 400Kg carcase.

RIB FAT (MM) ~ Estimates of the genetic differences between animals in fat depth at the 12/13th rib site, in a 400 Kg carcase.

RUMP FAT (MM) ~ Estimates of the genetic differences between animals in fat depth at the P8 rump site, in a 400Kg carcase.

RETAIL BEEF YIELD % (RBY%) ~ Estimates of the genetic differences between animals in percentage retail beef yield, in a 400Kg carcase.

INTRA-MUSCULAR FAT % (IMF%) ~ Estimates of the genetic differences between animals in percentage intra-muscular fat (marbling) at the 12/13th rib site, in a 400 Kg carcase.

NET FEED INTAKE TRAIL (KG/DAY) ~ Estimates of the genetic differences in feed intake for animals adjusted to the same growth rate and weight base.

DOCILITY (%) ~ Docility EBVs are estimates of genetic differences between animals in temperament. Docility EBVs are expressed as differences in the percentage of progeny that will be scored with acceptable temperament (ie. either "docile" or "restless").

ANGUS BREEDING INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems. The Angus Breeding Index is particularly suited to commercial producers who sell progeny into different markets, or to seedstock producers supplying bulls to commercial clients who produce for a range of different production systems and market end points.

DOMESTIC INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade. Steers are assumed to be finished using either grass, grass supplemented by grain or grain (eg. 50 -70 days) with steers slaughtered at 490 Kg live weight (270 Kg carcase weight with 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

HEAVY GRAIN INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 200 day feedlot finishing period for the grain fed high quality, highly marbled markets. Steers are assumed to be slaughtered at 760 Kg live weight (420Kg carcase weight with 30 mm P8 fat depth) at 24 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. There is a significant premium for steers that exhibit superior marbling.

HEAVY GRASS INDEX ~ Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers. Steers are assumed to be slaughtered at 620 Kg live weight (340 Kg carcase weight with 12 mm P8 fat depth) at 22 months of age. Daughters are retained for breeding and therefore maternal traits are of importance. Emphasis has been placed on eating quality and tenderness to favour animals that are suited to MSA requirements.

FULLY PREPARED COMPLETELY IN CONTROL

FARMERS' HAPPINESS

"We've been on the farm for 25 years, and we started working with CowManager in September 2020. It's definitely something I cannot imagine farming without."

BEEF HEIFER PROTOCOLS - 2022

FIXED-TIME AI (TAI)*

Short-term Protocols

7-day CO-Synch + CIDR®

Perform TAI at 54 ± 2 hr after PG with GnRH at TAI.

5-day CO-Synch + CIDR®

Perform TAI at 60 ± 4 hr after CIDR removal with GnRH at TAI. Two injections of PG 8 ± 2 hr apart are required for this protocol.

HEAT DETECT & TIME AI (TAI)

Select Synch + CIDR® & TAI

Heat detect and AI day 7 to 10 and TAI all non-responders 72 - 84 hr after PG with GnRH at TAI.

GnRH Cystorelin®, Factrel®, Fertagyl®, OvaCyst®, GONABreed®

PG estroPLAN®, Estrumate®, In-Synch®, Lutalyse®, Lutalyse® HighCon, ProstaMate®, SYNCHSURE™

BEEF COW PROTOCOLS - 2022

FIXED-TIME AI (TAI)*

7-day CO-Synch + CIDR®

Perform TAI at 60 to 66 hr after PG with GnRH at TAI.

5-day CO-Synch + CIDR®

Perform TAI at 72 ± 2 hr after CIDR removal with GnRH at TAI. Two injections of PG 8 ± 2 hr apart are required for this protocol.

FIXED-TIME AI (TAI)*

for Bos Indicus cows only

PG 5-day CO-Synch + CIDR®

Perform TAI at 66 ± 2 hr after CIDR removal with GnRH at TAI. Two injections of PG 8 ± 2 hr apart are required for this protocol.

HEAT DETECT & TIME AI (TAI)

Select Synch & TAI

Heat detect and AI day 6 to 10 and TAI all non-responders 72 - 84 hr after PG with GnRH at TAI.

Select Synch + CIDR® & TAI

Heat detect and AI day 7 to 10 and TAI all non-responders 72 - 84 hr after PG with GnRH at TAI.

For additional synchronization protocols visit BeefRepro.org
Use of sexed semen can result in conception rates that are decreased compared to conventional semen used in the same situation

HEAT DETECTION

Sexed semen can be used on any female observed in estrus (heat) and following synchronization with any protocol on the Cow or Heifer Protocol Sheet.

For best results with sexed semen *perform AI 16 to 22 hr* after detecting female in estrus. Use of estrus detection aids (EDA) is highly recommended.

FIXED-TIME AI

Time for Fixed-time AI (TAI) should be considered as the approximate average time of insemination based on the number of females to inseminate, labor, and facilities. To optimize pregnancy success, it is recommended to use sexed semen on females that have exhibited estrus before TAI and conventional semen on females that have not exhibited estrus.

HEIFERS

7-day CO-Synch+CIDR®

Perform TAI with GnRH at 72 ± 2 hr after PG.

COWS

7-day CO-Synch+CIDR®

Perform TAI with GnRH at 60 to 66 hr after PG.

HEIFERS ONLY

PG-7 7-day CO-Synch+CIDR®

Perform TAI with GnRH 72 ± 2 hr after second PG. Heifers in estrus receive sexed semen, heifers not in estrus receive conventional semen. *All heifers can also be inseminated with either sexed or conventional semen.*

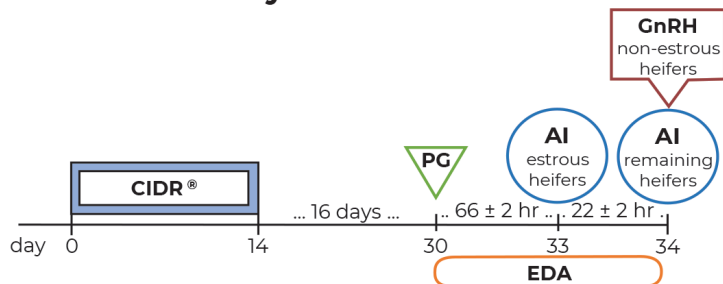

SPLIT-TIME AI (STAI)

Perform first TAI 66 ± 2 hr after PG in estrous females. GnRH administered at second TAI only in non-estrous females. Females detected in estrus by first or second TAI receive sexed semen. Females not in estrus receive conventional semen at second TAI.

HEIFERS ONLY

14-day CIDR®-PG & STAI

COWS & HEIFERS

7-day CO-Synch+CIDR® & STAI

EDA

Aervoe™, AIPaint™, Detect-her™, Estroject™, Kamar™, Mark-her™, Paintstik™, Quick Shot™, Tell Tail™, Twist-Stik™

GnRH

Cystorelin®, Factrel®, Fertagyl®, OvaCyst®, GONABreed®

PG

estroPLAN®, Estrumate®, Lutalyse®, Lutalyse® HighCon, ProstaMate®, SYNCHSURE™

These protocol sheets were assembled by the **Beef Reproduction Task Force**. Programs are intended to promote sustainable food production systems by the beef industry through sound reproductive management practices for replacement heifers and postpartum cows. The Beef Reproduction Task Force recommends working with a licensed veterinarian for proper use and application of all reproductive hormones. **Approved 11-17-2022.** www.beefrepro.org
